

Our HSE Commitment

It is TerraStruc's aim to create a working environment that is free of work related accidents and ill health. To this end we will pursue continuing improvements from year to year.

We undertake to comply with, and exceed statutory requirements by:

1. Identifying hazards within the workspace, assessing related risks and implementing appropriate preventative measures
2. Establishing and enforcing safe methods of work
3. Providing and maintaining appropriate tools, equipment and PPE
4. Recruiting and appointing personnel who have the ability, skills and competence commensurate with their role and level of responsibility
5. Ensuring tasks given to employees are within their skills, knowledge and ability to perform
6. Ensuring that technical competence is maintained through the provision of refresher training as appropriate
7. Promoting awareness of health and safety and of good practice through the effective communication of relevant information
8. Aligning our internal procedures with the OHSAS 18001:2007 standard
9. Furnishing sufficient funds needed to meet these objectives

All employees on their part will actively contribute to this policy by promoting a safe working environment and highlighting any risks to the relevant management team.

TerraStruc will review this policy annually, monitor its effectiveness and ensure that it reflects the changing needs and circumstances of the industry.

Johann Schoeman
General Manager
